

# Disclaimer

BreastScreening-AI public website

## 1. General information only

The BreastScreening-AI website, documents, pages, reports, figures, charts, and links are provided for general informational, research, educational, and business communication purposes. They are not professional medical, legal, regulatory, financial, investment, or clinical advice.

## 2. No medical advice or diagnosis

BreastScreening-AI does not provide medical advice, medical diagnosis, clinical decision-making, patient triage, emergency care, treatment recommendations, or a substitute for qualified healthcare professionals. Visitors should consult licensed clinicians for health questions and local emergency services for urgent medical needs.

## 3. Research software and evidence boundary

Unless expressly stated otherwise in a regulatory authorization, BreastScreening-AI materials describe research software, prototypes, validation work, scientific publications, pilots, or intended product direction. References to model performance, workflow impact, economic scenarios, or clinical potential are not guarantees of clinical efficacy, safety, regulatory clearance, reimbursement, commercial performance, or real-world outcomes.

## 4. No regulatory or product authorization claim

Website content should not be interpreted as a statement that any BreastScreening-AI system is authorized, certified, approved, cleared, or suitable for clinical use in any jurisdiction. Any future clinical use would depend on the applicable intended use, technical configuration, validation evidence, quality management, regulatory pathway, and local institutional approval.

## 5. External links and third-party content

The website may link to publications, repositories, funders, partners, news sources, social platforms, analytics services, career platforms, and other external websites. BreastScreening-AI is not responsible for third-party content, availability, privacy practices, cookies, security, or legal terms.

## 6. Forward-looking and economic information

Some materials may include market estimates, workflow scenarios, macroeconomic models, budget-impact reasoning, or strategic plans. These are illustrative and depend on assumptions that may change. They should not be treated as investment advice, financial forecasts, procurement guarantees, or promises of cost savings.

## 7. Accuracy and availability

BreastScreening-AI aims to keep public information accurate and current, but the website may contain omissions, outdated information, typographical errors, broken links, or incomplete evidence summaries. Content may be changed, removed, or updated without notice.

## **8. Limitation of reliance**

Visitors use the website and documents at their own discretion. Before relying on any content for clinical, legal, regulatory, procurement, investment, research, or operational decisions, visitors should obtain independent professional review and verify the underlying evidence and assumptions.

## **9. Contact**
